- **Industrial Motion**

TiMOTION's MA5 electric linear actuator is specifically designed for applications that face harsh working environments and require ruggedness and durability. Its IP69K protection can withstand high-pressure water jets, and the ingress of dust and other solid contaminants. The MA5 can also be customized with various feedback options depending on the application requirements; moreover, it can be equipped with a grease nipple to increase the protection degree and life cycle. Suitable applications for MA5 include agricultural equipment, such as valves, spreaders, harvesters, and grain handlers.

Note

1 Please refer to the approved drawing for the final authentic value.

2 This self locking force level is reached only when a short circuit is applied on the terminals of the motor. All the TiMOTION control boxes have this feature built-in.

3 The current & speed in table are tested with 24V DC motor. With a 12V DC motor, the current is approximately twice the current measured in 24V DC; speed will be similar for both voltages.

4 The current & speed in table are tested when the actuator is extending under push load.

5 The current & speed in table and diagram are tested with TiMOTION control boxes, and there will be around 10% tolerance depending on different models of the control box. (Under no load condition, the voltage is around 32V DC. At rated load, the voltage output will be around 24V DC)

6 Without load, noise level ≤ 78dBA (by TiMOTION test standard, ambient noise level ≤ 36dBA)

7 Standard stroke: Min. ≥ 20mm, Max. please refer to below table.

C, H	≤ 1000	600
D, K	≤ 1500	500
